- 1) The breakdown by investment policy is in line with the type of assets in which the investment funds primarily invest, usually on the basis of a stated strategy (e.g. if the fund invests primarily in shares and other equity, it is allocated to the "equity funds" category). Funds investing in both equity and bonds, without any prevalent policy for either of the instruments, are allocated to the "mixed funds" category. If a classification as equity, bond, mixed or real estate fund is not feasible, a fund is included in the residual "other funds" category.
