A fixed-based conversion method has been applied in order to proxy the euro, which consists of converting the national currencies into a single one using the bilateral exchange rates pre-announced on 3 May 1998, and then converting the resulting amounts into ECU at the official rate as at end-May 1998. The amounts may change slightly when recalculated at the official rate on 31 December 1998.

* Comprises monetary liabilities of MFIs and central government (post office, treasury) vis-a-vis non-MFI euro area residents excluding central government.

** Due to the lack of historic collected data allowing the calculation of the contributions of IE and LU for the reference period Dec96-Nov97 and of LU for the reference period Dec97-Aug98, estimations had to be made on the related underlying parts of the coverage.

The difference in levels will be adjusted for reclassifications, exchange rate variations, other revaluations, and any other changes which do not arise from transactions.

A fixed-based conversion method has been applied in order to proxy the euro, which consists of converting the national currencies into a single one using the bilateral exchange rates pre-announced on 3 May 1998, and then converting the resulting amounts into ECU at the official rate as at end-May 1998. The amounts may change slightly when recalculated at the official rate on 31 December 1998.
